

PHYSICAL ELECTRONICS GMBH

RX Solutions the X-Ray NDT specialist represented by Physical Electronics GmbH

Physical Electronics GmbH proudly announces its new partnership with RX Solutions. RX Solutions is a highly innovative French company specialized in manufacturing complete 3D X-ray tomography systems for industrial and research applications. Our customers will benefit from RX Solutions CT systems portfolio because it covers a large scale of analysis, from micro (4 μm) to nano (0.35 μm). For our customers this means, Micro & Nano-CT in the same chamber by switching the X-ray generators within a few seconds!

We will be representing RX Solutions in Germany, Austria and Switzerland providing our known Sales and Service.

Summary Advantages:

- Versatility & Reliability!
- Inspect both the external and internal structures of a part or object in a non-destructive way!
- More axes, contrary to most of other CT systems which are best to scan any kind of sample!
- Combine high-resolution X-ray micro and nano- CT Analyses in the same cabinet!
- High speed scanning, fastest scan 6s!
- Powerful and easy to use reconstruction artefacts correction algorithms!

We are convinced that RX Solutions products fit very well to our customer needs. See Inside Your Samples in 3D. We are looking forward to your request for more detailed information.
