

## Physical Electronics GmbH as Timegate's distributor in Germany, Austria and Switzerland

The Finnish company Timegate Instruments has entered into a distribution agreement with Physical Electronics GmbH. Timegate's team has a strong scientific background and extensive knowledge in R&D and innovation. The founder team has developed and patented the Timegated® Raman innovation which they have also commercialized. This multi-talented team has a lot of experience in spectroscopy, research, pharmaceuticals, mining, PAT and data applications. Timegate and we want to spread the joy of time-gating and ensure that is available for all who want to get more out of material analysis. The CEO of Timegate Mari Tenhunen is looking forward to the cooperation with Physical Electronics GmbH: *"We are impressed by Physical Electronic GmbHs' highly experienced team and organised way of working. Together we can establish a strong market position for Timegated® Raman spectrometers in German speaking market area."*

We are proud to represent Timegate Instruments in Germany, Austria and Switzerland. We believe that the PicoRaman instrument with its patented time-resolved technology fits perfect to our customers and their fields of activity.
